

# Aligning U.S.-Israel Cooperation on Technology Issues and China

Join us for a joint virtual panel discussion with the Institute for National Security Studies (INSS), Center for a New American Security (CNAS), and Foundation for Defense of Democracies (FDD) on "Aligning U.S.-Israel Cooperation on Technology Issues and China."

The United States and Israel have a long history as close allies. While the two countries have differed in their threat perceptions to China, especially with regards to Chinese investments in technology, both countries are committed to resolving the differences. In recent months CNAS, INSS, and FDD have convened a working group to discuss these issues and try to recommend a path to align U.S. and Israeli policies.
