Major Changes

- The Egyptian armed forces remained intact even though Egypt is undergoing a major political upheaval. The American military aid to Egypt also continues unchanged, thus we assess that existing procurement program will continue as scheduled.
 - The Egyptian military industry will produce 125 Abrams M1A1 MBTs, in addition to the existing 1005 tanks already produced. Bringing the total to 1,130 tanks.
 - The Egyptian air force received the first F-16 combat aircraft from the recent deal of 20. Their delivery would increase the total number to 237 F-16's. The air force has also received the first of three C-295M transport aircraft from Spain. The deal was extended to include 12 planes.
