Major Changes

- It was revealed that Saudi Arabia received and deployed Chinese made DF-21 (CSS-5) IRBMs. The missiles have probably arrived in 2007. They might have replaced the old DF-3A missiles, which were procured in 1988.
 - The RSAF received 24 of its 72 Typhoon combat aircraft, ordered from the UK. Production of the remaining aircraft will NOT be conducted in Saudi Arabia, but in the UK.
 - The RSAF ordered 84 new F-15SA combat aircraft from the USA. The deal also includes upgrading the existing 68 F-15S to the F-15SA standard.
 - The RSAF has ordered additional 12 AH-64D Apache combat helicopters and will upgrade the 12 existing older Apache AH-64A to the same standard. Other programs for the RSAF include an order for 6 A330 MRTT refueling aircraft, of which the first has already been supplied. The RSAF ordered new training aircraft – PC-21 and Hawk AJT. These will be supplied in 2014 and 2016 respectively.
 - The Saudi Arabian National Guard continues its upgrade program which includes the procurement of 724 new Piranha LAV IFVs from Canada, and 100 155mm CAESAR howitzers from France.
