event host:

THE GEORGE WASHINGTON UNIVERSITY
WASHINGTON, DC

The Annual INSS-CSFI Cyber Conference

Washington D.C.

April 27-28, 2015

The need to share and enhance knowledge regarding Defensive Cyberspace Operations & Intelligence (DCOI) is growing as cyber threats continuously develop and transform globally. The Cyber Security Program of the Institute for National Security Studies (INSS) and Cyber Security Forum Initiative (CSFI) are proud to host their annual Defensive Cyberspace Operations & Intelligence Conference with the purpose of fostering international cooperation on issues of security, intelligence, and defense.

The conference aims to contribute to an informed public debate on cyber-net security and to promote international collaborations in the technological, legal, and policy-making domains.

Conference Speakers and Workshops:

Speakers at the conference will include top-level Israeli, US, and international officials dealing with cyber defense and intelligence, elite technology experts and government officials.

Panels:

National Policy & Strategy
Analyzing a new generation of national cybersecurity strategies; speakers will include international senior policy and decision makers

Critical Infrastructures Security
Securing industrial control systems is becoming more and more vital. This session will discuss 2015 security challenges and present latest development in this field

Advanced Cyber Defense
Presenting leading defense concepts and technologies by top notch experts

Cyber Intelligence
Focusing on the necessity for strategic intelligence, and how to utilize and leverage cyber security through implementation of intelligence capabilities

Protecting Financial and Corporate Sectors
Latest cyber-security strategies and policies developments

Why attend this event?

Share knowledge on the latest cyber security developments
Hear the best elite experts on defensive cyber operations
Network with worldwide delegates
Visit advanced technology firms and exhibitions

Why should companies and industry attend this event?

This event will provide global cyber security organizations an opportunity to increase their product exposure to a unique audience of sophisticated investors, buyers, researchers, and investors in the region.
